**URINE MICROALBUMIN Test Strips**

The Clinitek 50/Status meter measures the actual value of the Albumin and Creatinine then computes the Alb/Creat Ratio and defines the Normality/Abnormality. It then adjusts the Albumin and Creatinine values to the nearest target value, prints these and the Alb/Creat band.

**N.B: The result is not as accurate as laboratory testing and should be interpreted with caution.**

<b>Alb/Creat Ratio</b>	<b>&lt;3.4 mg/mmol</b>	<b>Normal</b>
<b>Alb/Creat Ratio</b>	<b>3.4 – 33.9 mg/mmol/l</b>	<b>Abnormal</b>
<b>Alb/Creat Ratio</b>	<b>&gt;33.9 mg/mmol</b>	<b>Grossly Abnormal</b>
